

COMMANDERSCOPE™

This 8X42 monocular is designed to replace binoculars currently used by military and law enforcement personnel.

The light weight COMMANDERSCOPE™ is easily carried in a pouch on the soldier's MOLLE and can be rapidly deployed to quickly identify distances to the target.

A COMMANDERSCOPE™ will eliminate the "double image" usually experienced with binoculars. Its large objective lens is designed for low light conditions and ideal for twilight and cloudy weather.

A built in Reticule allows for more accurate distance assessment and the built in Compass makes it easy to acquire target azimuth measurements.

The COMMANDERSCOPE™ is waterproof (up to 3ft for 1 hour) to sustain any weather condition.

Parameter	Specifications
Power	X8
Objective Lens	42mm, Fully Coated
Type of Prism	Porro BAK4
Minimum Focus Distance	39ft (13m)
Angular Field of View	7°
Linear Field of View	369ft at 1000yds (123m at 1000m)
Eye Relief	18mm
Water proof	3ft (1m) for 1 hour
Nitrogen Filled	Yes
Weight	13oz (370g)
Size	2.4"x 2.5"x 5.6" (61x63x143mm)
